AMAZON PRODUCTS

The screenshot shows the Postman API client interface. At the top, there's a navigation bar with 'Home', 'Workspaces', and 'API Network'. Below this, the 'My Workspace' section is visible. The main area is divided into three panes: 'Collections' on the left, 'Request' in the middle, and 'Response' on the right. The 'Request' pane shows an HTTP GET request to the URL 'http://0.0.0.0:3000/api/products?productId=1&maxPrice=10000'. The 'Response' pane shows the response body, which is a JSON array of two product objects. The first product has a name 'Laptop 15"', price 1500, rating 4.5, discount 10, and stock 10. The second product has a name 'Laptop 16"', price 1600, rating 4.7, discount 10, and stock 10.
